

Village Street Resurfacing

TRAFFIC UPDATE: In an effort to make repairs to Village Street prior to the Route 109 project getting underway, DPS Crews and contractors have begun preparing for resurfacing from Cottage Street to the Millis Town Line. This will be a temporary overlay only, but will provide for a better and safe travelling surface for the next several years until we are in a position for a full refurbishment project consisting of drainage, sidewalk, and street surface improvements.

Today crews have started raising manholes & structures on Village Street. We has all motorists to use caution during this period, and to expect some delays from time to time as only one lane will be passable in work zones. Resurfacing will be completed in the next few weeks.

Thank you for your patience!
