AERIAL APPLICATION - NOTICE

Please be advised that the Norfolk County Mosquito Control District will be conducting aerial larval control helicopter applications for 2 to 4 days; tentatively beginning on *Thursday, April 19 through Friday, April 27, 2018 (weather permitting)*. These applications are not 'sprays', but instead are granular applications of a biological larvicide applied to wetlands only.

The District will call, each morning, those public safety departments in whose towns the application will be taking place. Attached is the town map of the wetlands targeted by the helicopter along with a memo describing the helicopter. If you could forward those 2 documents to both public safety departments, I would appreciate it.

We receive very few complaints from residents regarding these applications. Many residents who live near the wetlands we treat are familiar with the application. Nevertheless a general notification to the public is appropriate (Town Website, local newspapers, cable, and message boards).

If you have any questions, please contact the office. Thank you for your assistance.
