LIMIT OF WORK – The boundaries of the full extent of the area of land to be altered or disturbed during a construction project. The boundary beyond which no construction work will take place. Includes but is not limited to the areas where trees and other vegetation will be cleared, where the sod layer and other earth materials will be removed, where excavation and grading will occur, where buildings and infrastructure will be constructed, and areas to be used for truck parking, equipment storage, and material storage during construction. Limit of Work is also known as the area encompassed by erosion controls.

MS4 (Municipal Separate Storm Sewer System) – A conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, getters, ditches, manmade channels, or storm drains):
