Subject: 39 Main St

Good Morning ,

I just met with Dan Merriken and Geoff Engler regarding the hydrants for this project. Two hydrants will be located inside the complex and on private property, therefore the town will not be maintaining them. I have expressed my concern with the maintenance and upkeep that is required. We are finding that most private yard hydrants in town are not maintained (flushed annually) and in some cases do not operate at all. Obviously this creates a problem for the fire department in the event of a fire.

They both have agreed to put something in writing about the upkeep and maintenance of both hydrants on the property. Could you just make sure this gets documented somewhere, if and when there is a final approval

We would like to have this in writing for future projects as well.

Thank you.
